PROFESSIONAL SUMMARY

Skilled full-stack developer experienced in React, Redux, and Python. Proficient in delivering high-quality web solutions, managing project timelines, and collaborating with diverse teams. Seeking innovative projects in a dynamic environment. Open to relocation.

PROJECTS

YouTut (React, Redux, Node.js, Python, Flask, AWS S3, CSS3, SQLite, SQLAlchemy, Docker, Heroku)   **Live Site | Github**
A fullstack YouTube clone specializing in online tutorials, where users can stream, upload, and comment on videos.
- Built and managed API routes, enhancing backend performance and improving front-end interaction.
- Leveraged AWS S3 for efficient handling of user video and image uploads and storage.
- Boosted user engagement via a custom shuffling algorithm.
- Ensured user-friendly video uploads with custom error handling for format and size compatibility.
- Applied custom error handling for video uploads, ensuring user-friendly notifications and prevention of invalid data submission.

Instacrumbz (React, Redux, Python, Flask, HTML5, CSS, SQLite, SQLAlchemy, Docker, Heroku)   **Live Site | Github**
A fullstack Instagram clone where users can upload posts, add photos, add comments, and like their favorite posts or images.
- Developed custom API routes for dynamic data retrieval, contributing to an efficient and interactive user experience.
- Delivered the project within a week, utilizing Agile methodologies and working effectively within a small team.
- Led the application deployment to Heroku via Docker, ensuring seamless user experience.
- Enhanced team productivity by implementing a Kanban system, fostering a culture of organization, test-driven development, and accountability.
- Maintained the frontend single post component alignment with the target site, ensuring consistent user experience.

Mic Lockr (React, Redux, Express, Sequelize, HTML, CSS, PostgreSQL, Node.js, Heroku, AWS S3, Bootstrap)   **Live Site | Github**
A fullstack Flickr clone where users can share images of their favorite microphones, and leave comments.
- Implemented API routes for robust CRUD operations on images and comments.
- Managed user image uploads through AWS S3.
- Empowered users to perform full CRUD operations on images and comments using Redux for state management.
- Integrated Bootstrap framework for an enhanced and standardized design and usability.
